Northeast Region Weekly Update
May 26, 2023

Thank You
to all our service men and women who have given of themselves for our freedom!

DCEO Grants & Programs

May Is Asian American & Pacific Islander Heritage Month Across Illinois
The Illinois Department of Commerce and Economic Opportunity (DCEO) launched its Asian American and Pacific Islander (AAPI) Heritage Month celebrations which include a proclamation recognizing AAPI Heritage Month, spotlighting AAPI-owned businesses, hosting a series of business resource events and elevating community events throughout May 2023. Additional information about resources and events can be found here.

Throughout AAPI Heritage Month, DCEO is honoring the AAPI community and the nearly 22,000 AAPI-owned businesses with employees and more than 77,000 AAPI-solopreneurs. Additionally, for the first time in state history, DCEO hired an AAPI Business Development Manager – an Office of Minority Economic Empowerment (OMEE) team member dedicated to supporting the growing AAPI community.

AAPI-owned businesses continue to prove their resiliency and fortitude as they persevere through the rise in anti-AAPI sentiments and hate crimes in their communities since the onset of the pandemic. DCEO is committed to creating an equitable and inclusive business environment through significant investments in equity-based programs, outreach, and funding opportunities.

DCEO AAPI Heritage Month Events:
DCEO's Offices of Minority Economic Empowerment (OMEE) and Regional Economic Development (RED), alongside community and civic groups curated the following virtual events featuring business resources, highlighting the AAPI community's resilience, and recognizing AAPI businesses and their contributions to Illinois. Participants can learn more and register for events on DCEO's AAPI Heritage Month page:

AAPIHM 2023 Small Biz Pop-Up Market & Social
Wednesday | May 31, 2023 | 5:00 PM - 8:00 PM | IN-PERSON | REGISTER
Location: Chicago Food Stop, 875 N. Michigan Ave., Chicago, IL 60610
Join the Illinois Department of Commerce & Economic Opportunity (DCEO), World Business Chicago (WBC), and Chicago Asian Network (CAN), for a special final day of AAPI Heritage Month celebration with a panel of distinguished AAPI food entrepreneurs, innovative pop-up vendors, and essential business resources! Be inspired, connect, enjoy great food, and jam to DJ JayFunk! Attendance to this FREE in-person event is limited to the first 150 registrants.

More information on AAPI Heritage Month and instructions to sign up for events in May can be found at DCEO’s website. Updates on other small business supports available can be found by calling the First Stop hotline at 1.800.252.2923 or following DCEO at @IllinoisDCEO for updates on programs.

**Blue Collar Jobs Act Construction Tax Credits for Illinois Businesses**

Governor JB Pritzker and the Illinois Department of Commerce and Economic Opportunity (DCEO) today announced the launch of the Blue Collar Jobs Act (BCJA) Tax Credit application for eligible companies. BCJA is a bipartisan legislative package designed to promote economic expansion and growth in Illinois by incentivizing construction projects. The legislation makes $20 million in tax credits available per year for eligible companies.

The BCJA amended legislation for Illinois’ premier incentive programs to provide tax credits attributable to the wages paid to construction workers on eligible projects. Eligible companies include those who are located in an Enterprise Zone (EZ) or a River Edge Redevelopment Zone (RERZ), companies designated a High Impact Business (HIB), or companies with an agreement under the Economic Development for a Growing Economy (EDGE) Program. Companies that completed construction projects in 2021 (the effective date of the legislation) or later are eligible to apply for credits.

Eligible companies can receive tax credits equal to 75 percent of the income tax attributable to construction workers on eligible projects located in an underserved area, or 50 percent for projects located in other areas. The BCJA is designed to further incentivize major capital investments in communities across Illinois and create good-paying construction jobs. Providing tax incentives specifically for construction projects supports job creation and additional investments in communities. DCEO currently leverages this innovative tax credit structure for construction jobs as part of the Reimagining Energy and Vehicles (REV) and Manufacturing Illinois Chips for Real Opportunity Act (MICRO) tax credit programs.

DCEO will host a technical assistance webinar to share details regarding the BCJA program application and processes on Monday, June 26, 2023, from 1 p.m. – 2 p.m. Click here to sign up and RSVP; companies looking for information are encouraged to email ceo.bcja@illinois.gov or visit the BCJA website.

**Federal Grant Support Program**

The State of Illinois benefits economically when federal funds are invested in Illinois. Federal grant funding is distributed by formula and non-formula (or competitive) grants. Competitive federal grants typically require a match, which is the non-federal share of the project costs that a grantee must contribute to achieve the purposes of the award. In some instances where there is no formal matching requirement, the percentage of the match provided by the grantee is used as a metric for evaluating the competitiveness of an application.

The Department’s Federal Grant Support Program will make up to $15 million available to Illinois based businesses and organizations seeking competitive federal grants. The Department may provide a grant up to
$2,000,000 that entails up to a 1:1 match of the applicant’s cash contribution towards the project. This matching grant program is intended to encourage more Illinois-based applicants to apply for federal grant opportunities, provide critical assistance to meet the minimum match eligibility requirements, increase the competitiveness of applications, and provide the State of Illinois with an opportunity to make a firm commitment and demonstration of support for projects that are well aligned with the State’s economic development goals and priorities.

Eligible applicants will apply for this program while they are preparing an application for a federal grant. Successful applicants will then receive a letter of commitment that they will be awarded a Federal Grant Support grant from the Department, contingent on receiving a federal award.

Additional information and the NOFO can be found here

**SSBCI Funding to Support Small Businesses**
The U.S. Department of the Treasury announced that Illinois will receive up to $354.6 million to administer four programs as part of the State Small Business Credit Initiative (SSBCI). The expanded program offering through SSBCI will enable Illinois to support small businesses across the state - helping them attract more capital investment and expand or launch business operations, while supporting key sectors. All of the new programs will launch in the coming months.

- **Advantage Illinois (AI) Loan Participation Program (Existing Program)**
  Advantage Illinois' existing Loan Participation Program provides low-interest loans to small businesses by partnering with local lenders located across the state. In 2022 as of December, 71 percent of AI loans have gone to businesses owned by people of color, women, people with disabilities or veterans.

- **Advantage Illinois (AI) Loan Guarantee Program (New Program)**
  Advantage Illinois' new Loan Guarantee Program will support business applicants who are having difficulty gaining access to capital by using funds to guarantee a percentage of loans provided by partner lenders. By guaranteeing a percentage of the loan, it makes loans more attractive to lenders and has the potential to increase the funds received by the businesses.

- **INVENT Venture Capital Program (VCP) (New Program)**
  Innovation Venture Fund (INVENT) will operate as a direct equity program with a focus on investing in businesses in key industries such as agriculture, ag tech, information technology, life sciences, manufacturing, quantum, and more.

- **Climate Bank Finance Loan Participation Program (New Program)**
  This new program will be overseen by DCEO and administered by the Illinois Finance Authority (IFA), which will partner with local lenders to issue the loans. Climate Bank funds will be available to small businesses in the clean energy sector.

  The programs will launch in the near future; interested businesses should fill out this form to receive additional information and updates when the programs are launched.

**Climate Works Pre-Apprenticeship, Barrier Reduction Programs**
Governor JB Pritzker and the Illinois Department of Commerce and Economic Opportunity (DCEO) launched $10 million in funding for the Climate Works Pre-Apprenticeship Program and $6 million for the Energy Transition Barrier Reduction Program as part of the Climate and Equitable Jobs Act (CEJA). The programs will increase
training opportunities in the trades, expand the clean energy talent pipeline, and boost diversity in the clean energy trade industries by providing resources to limit barriers to participation. The programs will be run through training partners which will be selected through a competitive Notice of Funding Opportunity (NOFO) process.

The Climate Works Pre-Apprenticeship Program will align with the needs of clean energy employers in the construction and building trades, provide students with nationally recognized certifications, and provide a pathway to an apprenticeship in the growing renewable energy, electrification and energy efficiency industries. The program will also provide access to educational and career counseling along with hands-on learning that will reinforce foundational professional skills taught in the classroom.

People of color, women, and other underrepresented populations have historically been significantly underrepresented in apprenticeship programs. A pre-apprenticeship helps break down barriers and provide greater access to apprenticeships, which provide a pathway to good-paying long-term careers. The Climate Works model provides nationally recognized credentials, provides funding to cover costs to address barriers, and provides hands-on support that will help program graduates enter an apprenticeship program and lay the foundation for a long-term career in a growing sector.

The program is expected to enroll 500-700 pre-apprentices during its first year, with capacity increasing over the course of the program. Climate Works will help participants secure good-paying clean energy careers in construction, installation, maintenance and repair activities after being trained on topics specific to clean energy such as solar PV basics and building energy efficiency.

Through a competitive Notice of Funding Opportunity (NOFO), qualified entities can apply for grants, with awards ranging from $3 million to $6.5 million (inclusive of Illinois Climate Works and Barrier Reduction Program funding). Applications will be accepted until June 2, 2023, at 5:00 p.m. To view the NOFO and apply for the grant, please visit the DCEO website. Interested parties are encouraged to reach out to CEO.GrantHelp@illinois.gov for application assistance.

**Connect Illinois Round 3 Open & Accepting Applications**

Through multiple rounds of competitive matching grants, Connect Illinois seeks to achieve what no other state or federal approach to date has accomplished: ubiquitous broadband access for homes, businesses, and community anchor institutions. At the same time, Connect Illinois seeks progress in digital equity and inclusion while leveraging investment in new broadband infrastructure to spur advances in use and innovation for such areas as agriculture, economic development, education, and telehealth.

Applications should be classified under one of three categories: (a) Broadband Access for Illinois homes, businesses, and community anchor institutions in unserved or underserved areas; (b) Broadband Innovation for economic development and related applications; or (c) Urban Broadband for expanded access and/or innovation in qualified Illinois cities or metropolitan areas of 75,000 residents or more.

All Connect Illinois projects must include infrastructure expansion scalable to speeds of at least 100 Mbps download and 100 Mbps upload upon deployment.

For Broadband Access projects, proposals covering unserved and/or underserved areas are eligible for Connect Illinois grant funding via this NOFO. An unserved area is an area of Illinois in which households, businesses, or community anchor institutions lack access to wireline broadband service of at least 25/3...
Mbps. An underserved area is an area of Illinois in which households, businesses, or community anchor institutions have wireline broadband access of at least 25/3 Mbps but less than 100/20 Mbps.

To view the NOFO and apply, click here.

**Community Development Block Grant – Economic Development**

Only units of general local government (i.e., cities, villages, townships and counties) may apply for funding. Eligible municipalities shall not receive funding from HUD as an entitlement city. Counties and townships that are not participating in the HUD Urban County Entitlement Program are also eligible to apply for block grant funds.

*For your application to be considered, your entity must be pre-qualified. For more information on pre-qualification, please visit [https://dceo.illinois.gov/aboutdceo/grantopportunities/granteeresources.html](https://dceo.illinois.gov/aboutdceo/grantopportunities/granteeresources.html).*

To view the NOFO click here. **Applications accepted on a rolling basis.** Apply here.

**Meat & Poultry Supply Chain Capital Grant Program**

Governor JB Pritzker and the Illinois Department of Commerce and Economic Opportunity (DCEO) announced a new $6 million capital grant program designed to strengthen the meat and poultry supply chain by helping independently owned meat processing companies in Illinois build capacity and create and retain jobs. Through the Meat & Poultry Supply Chain Capital Grant Program, companies are eligible for grants of $250,000 to $1.5 million, with a company match of at least four times the amount awarded. The Meat & Poultry Supply Chain Capital Grant Program aims to support communities by helping independently owned companies build capacity, create jobs and ultimately, strengthen our meat processing supply chain in Illinois, thereby making food products more affordable and accessible. Eligibility is restricted to plants that are not operated by the four largest meat processing companies that own most of the nation’s meat processing market share. Through the program, companies can receive funding for the construction of a new facility, expanding or renovating existing facilities, and modernizing processing and manufacturing equipment. As part of DCEO’s commitment to equity, the application process prioritizes applicants located in underserved and rural areas.

Grants will be issued on a rolling basis; interested parties can find more information on the Notice of Funding Opportunity (NOFO) here.

**Other State Agency Grants & Programs**

**IDOT Funding Opportunities Workshops**

The Illinois Department of Transportation is hosting several workshops throughout the state in May and June to help local governments and communities learn about and apply for funding opportunities. The Special Programs Assistance Conferences are designed to help potential grantees take part in the department’s Economic Development Program, Illinois Transportation Enhancement Program and Safe Routes to School Program.

Staff from IDOT will be available to offer general information and answer questions one-on-one. Each conference will take place over two days, with morning sessions the first day and morning and afternoon sessions the second day. **Advance registration is encouraged.** Visit the Illinois Transportation Enhancement Program and Safe Routes to School Program pages to view the schedule and learn more.
More details on the Economic Development Program are available here.

IHDA Community Revitalization

The Illinois Housing Development Authority (IHDA) announced $15 million in available grant funding to support affordable housing and community revitalization efforts across the state. Available under the second round of IHDA’s Strong Communities Program (SCP), the initiative provides funding to units of local government and land bank authorities for the acquisition, maintenance, rehabilitation and demolition of abandoned residential properties in their communities. The program is designed to support local revitalization efforts and attract further investment in communities that may lack the resources needed to tackle vacant, abandoned and deteriorated properties.

Created in August 2020, this round of the Strong Communities Program provides grants of up to $750,000 to help Illinois municipalities, counties and land banks address local affordable housing needs and community revitalization efforts. The program aims to return vacant residential properties to productive and taxable use through rehabilitation and provide funds for demolition in cases where properties are beyond repair and negatively impacting neighboring residences. As a result, SCP will help to increase property values, create jobs, help reduce crime, generate additional tax revenue and attract further community investment.

A link to the application can be found here. Applications will be accepted through 3 p.m. on Wednesday, June 7, 2023.

The grants are funded by the Rebuild Illinois capital plan and will leverage IHDA’s ongoing state- and federally-funded revitalization initiatives in underserved communities around the state. A total of $30 million in grant funding will be awarded through the program over two application rounds.

IDNR Illinois Natural Areas Stewardship Grants

The Illinois Department of Natural Resources (IDNR) will accept applications through June 16, 2023, for Illinois Natural Areas Stewardship grants.

The goal of this grant program is to increase the delivery of much needed stewardship activities to natural areas protected within the Illinois Nature Preserves Commission (INPC) system. Stewardship needs throughout the state have continued to outpace the ability to deliver these services by individuals, volunteers, organizations, and government agencies. The program is designed to fund projects that immediately address this deficiency and begin to expand on the stewardship capacity of Conservation Land Trusts through grants that will expand their staff and equipment for these activities.

Stewardship activities funded by this grant program must be included in the management schedules approved by the INPC and are limited to a maximum of $100,000 per proposal. Eligible costs may include contractual services, staff time related to the project, equipment, and materials necessary to complete stewardship projects such as tools, safety items, herbicide, construction materials, and indirect costs. Benefit costs are not eligible. Matching funds are required on all projects. The minimum match requirements allowed by administrative rule are 5% or $1,000, whichever is less, to ensure that all land trusts will have access to the program.

Eligible applicants are Conservation Land Trusts exempt from taxation under Section 501(c)(3) of the federal Internal Revenue Code and whose originating documents include in its purposes the restoration and stewardship
of land for conservation purposes. Potential applicants for this program can find more information online at: https://dnr.illinois.gov/grants/stewardshipgrants.html. Questions can be directed to Susan.Duke@Illinois.gov.

Illinois EPA Electric School Buses
Illinois Environmental Protection Agency (Illinois EPA) Director John J. Kim announced a $27,023,485 Notice of Funding Opportunity (NOFO) to fund the replacement of existing diesel school buses with new all-electric school buses located and operated in any of the three priority areas outlined in the Beneficiary Mitigation Plan (BMP). Illinois EPA will also fund a portion of new electric charging equipment if charging infrastructure is needed. This opportunity continues the Pritzker Administration’s commitment to focus Illinois’ remaining Volkswagen (VW) Settlement funding on electric transportation and infrastructure.

Through this funding opportunity, Illinois EPA intends to fund projects in the three priority areas outlined in the VW BMP and specified in the NOFO:

- **Priority Area 1**: Cook, DuPage, Kane, Lake, McHenry, and Will counties, Oswego Township in Kendall County, and Aux Sable and Goose Lake townships in Grundy County.
- **Priority Area 2**: Madison, Monroe, and St. Clair counties.
- **Priority Area 3**: Champaign, DeKalb, LaSalle, McLean, Peoria, Sangamon, and Winnebago counties.

Eligible applicants include school districts that own their buses or commercial school bus providers. Purchased buses must serve a school district within one of the three priority areas. Existing diesel buses must be engine Model Year 2009 and older diesel-powered Class 4 – 8 school buses and must be scrapped within 90 days of the new bus being placed into service.

All required forms and information can be found on the Driving A Cleaner Illinois webpage: https://epa.illinois.gov/topics/air-quality/driving-a-cleaner-illinois.html. Applications for the Driving a Cleaner Illinois – Volkswagen All-Electric School Buses **NOFO will be accepted through 5:00 PM (CST) on September 5, 2023.** All applicants must pre-qualify through the Grant Accountability and Transparency Act Grantee Portal.

IHDA Home Improvement Grants
The Illinois Housing Development Authority (IHDA) announced the grand opening of the Home Repair and Accessibility Program (HRAP) designed to assist low-income and very low-income homeowners with health, safety, accessibility, and energy efficiency repairs to their homes. HRAP will provide $15.3 million to preserve existing affordable housing stock, provide investment in underserved communities, improve the health and well-being of occupants, and help people with disabilities stay in their homes and communities. Eligible homeowners may receive up to $45,000 to cover necessary repairs through a five-year, forgivable loan.

HRAP will be administered locally through 36 local government and nonprofit organizations with experience operating and administering homeowner rehabilitation assistance programs. To be eligible, homeowners must be at-or-below 80 percent of the Area Median Income based on household size, current on their mortgage payments, and the property must be single-family.

For owner-occupied properties, the property must be the homeowner’s primary residence. Permanently affixed mobile homes are allowed if the homeowner owns the land underneath the mobile home and they can record the IHDA mortgage against the property. Renter-occupied properties are also eligible to make accessibility upgrades.
More information on eligibility and a list of administering agencies can be found at [https://www.ihda.org/my-community/revitalization-programs/](https://www.ihda.org/my-community/revitalization-programs/).

Properties eligible for rehabilitation must have documented health and safety issues or concerns, such as mechanical, electrical, structural or plumbing that undermine the integrity of the home. Properties eligible for accessibility must require accessibility improvements to assist an occupant with a disability or mobility impairment. The properties may also have other documented health and safety issues, and any significant issues discovered during the inspection must be addressed by the rehabilitation. A “roof only” option is also available for properties with no other significant documented health and safety issues. For this option, eligible homeowners may receive up to $21,500. Assistance is provided as a three-year, forgivable loan.

Households can apply for HRAP grants by contacting one of the funded organizations that serves their community. These organizations will provide more information on eligibility and the application process. Contact information for each organization is available on IHDA’s website [here](https://www.ihda.org/my-community/revitalization-programs/). Households residing in areas not currently served by HRAP are encouraged to contact a HUD-certified housing counseling agency to discuss their options beyond HRAP.

**About the Illinois Housing Development Authority**

IHDA ([www.ihda.org](http://www.ihda.org)) is a self-supporting state agency that finances the creation and the preservation of affordable housing across Illinois. Since its creation in 1967, IHDA has allocated $18 billion and financed approximately 255,000 affordable housing units for residents of Illinois.

---

**Statewide PACE Program - Clean Energy Renovations and New Construction**

Governor JB Pritzker and the Illinois Finance Authority announced the launch of a statewide PACE (Property Assessed Clean Energy) program to spur investment in electric vehicle charging stations, energy efficiency, and water conservation, and to stimulate the growth of renewable energy and resilient building design throughout Illinois. The Illinois Finance Authority PACE program, now available to all Illinois counties and municipalities, is designed to reduce costs, improve service delivery, and create uniformity in Illinois’ Commercial Property Assessed Clean Energy (C-PACE) financing market.

Under Illinois law, counties, cities, villages, and incorporated towns may create PACE areas at the request of for-profit and non-profit owners of commercial, industrial, and multi-family (of 5 or more units) properties. C-PACE financing can be used by owners and developers of commercial properties to finance or refinance eligible clean energy improvements in connection with the renovation of existing buildings and new construction, in each case up to 25% of the value of the property. Counties and municipalities interested in learning more about the Illinois
Finance Authority PACE Program are encouraged to visit its website [here](https://financeauthority.ca). Contact Brad Fletcher ([bfletcher@ilfa.com](mailto:bfletcher@ilfa.com)) to opt into the Illinois Finance Authority PACE Program for free!
